

News from Skandiabanken Open Banking

2026-06-04 SEK Batch Now Live in Production

Information for Users of Skandiabanken Open Banking APIs.

We are pleased to announce that the new SEK Batch infrastructure is now live in production. As part of this release, we have successfully migrated existing subscriptions to the latest API versions:

Account Information Service (AIS) – V3
Payment Initiation Service (PIS) – V4

This means that you can now start using the new versions directly without any additional onboarding steps.

What This Means for You

With the go-live, you can now begin integrating and using the updated APIs aligned with the ISO20022 message standard and the Nordic Payment Council (NPC) schemes.

Next Steps

- Start using the new API versions in production
- Ensure your integration fully supports the new required fields and formats
- Verify your payment and account information flows with the updated structure

Please note that previous versions (AIS V2 and PIS V3) will be decommissioned at the end of August. Continued use of the APIs requires migration to the new versions before this date.

Upcoming changes:

Support for RF-payments with IBAN and transfers with IBAN during fall 2026 (further information will be provided).

If you have any questions, please do not hesitate to contact us.

Best regards,
Skandiabanken Team Open Banking
