The same applies to the Paying Agent.
2. The period for presentation of the Notes (§ 801 paragraph 1, sentence 1 German Civil Code (*BGB*)) shall be ten years and the period of limitation for claims under the Notes presented during the period for presentation shall be two years calculated from the expiry of the relevant presentation period.

§ 15 FINAL CLAUSES

1. The Notes and the rights and duties of the Noteholders, the Issuer, the Paying Agent and the Guarantor (if any) shall in all respects be governed by the laws of the Federal Republic of Germany except § 1 paragraph 1 – 3 of the Terms and Conditions which shall be governed by the laws of the relevant jurisdiction of the Clearing System.
2. In the event of manifest typing or calculation errors or similar manifest errors in the Terms and Conditions, the Issuer shall be entitled to declare rescission (*Anfechtung*) to the Noteholders. The declaration of rescission shall be made without undue delay upon becoming aware of any such ground for rescission (*Anfechtungsgrund*) and in accordance with § 13. Following such rescission by the Issuer, the Noteholders may instruct the account holding bank to submit a duly

completed redemption notice to the Paying Agent, either by filling in the relevant form available from the Paying Agent or by otherwise stating all information and declarations required on the form (the "**Rescission Redemption Notice**"), and to request repayment of the Issue Price against transfer of the Notes to the account of the Paying Agent with the Clearing System. The Issuer shall make available the Issue Price to the Paying Agent within 30 calendar days following receipt of the Rescission Redemption Notice and of the Notes by the Paying Agent, whichever receipt is later, whereupon the Paying Agent shall transfer the Issue Price to the account specified in the Rescission Redemption Notice. Upon payment of the Issue Price all rights under the Notes delivered shall expire.

3. The Issuer may combine the declaration of rescission pursuant to paragraph 2 with an offer to continue the Notes on the basis of corrected Terms and Conditions. Such an offer and the corrected provisions shall be notified to the Noteholders together with the declaration of rescission in accordance with § 13. Any such offer shall be deemed to be accepted by a Noteholder (and the rescission shall not take effect), unless the Noteholder requests repayment of the Issue Price within four weeks following the date on which the offer has become effective in accordance with § 13 by delivery of a duly completed Rescission Redemption Notice via the account holding bank to the Paying Agent and by transfer of the Notes to the account of the Paying Agent with the Clearing System pursuant to paragraph 2. The Issuer shall refer to this effect in the notification.
4. "**Issue Price**" within the meaning of paragraph 2 and 3 shall be deemed to be the higher of (i) the purchase price that was actually paid by the relevant Noteholder (as declared and proved by evidence in the request for repayment) and (ii) the weighted average (as determined by the Issuer in its reasonable discretion (*billiges Ermessen*) (§ 315 German Civil Code (*BGB*)) of the traded prices of the Notes on the Payment Business Day preceding the declaration of rescission pursuant to paragraph 2. If a Market Disruption Event exists on the Payment Business Day preceding the declaration of rescission pursuant to paragraph 2, the last Payment Business Day preceding the declaration of rescission pursuant to paragraph 2 on which no Market Disruption Event existed shall be decisive for the ascertainment of price pursuant to the preceding sentence.
5. Contradictory or incomplete provisions in the Terms and Conditions may be corrected or amended, as the case may be, by the Issuer in its reasonable discretion (*billiges Ermessen*) (§ 315 German Civil Code (*BGB*)). The Issuer, however, shall only be entitled to make such corrections or amendments which are reasonably acceptable to the Noteholders having regard to the interests of the Issuer and in particular which do not materially adversely affect the legal or financial situation of the Noteholders. Notice of any such correction or amendment shall be given to the Noteholders in accordance with § 13.
6. If the Noteholder was aware of typing or calculation errors or similar errors at the time of the acquisition of the Notes, then, notwithstanding paragraphs 2 - 5, the Noteholders can be bound by the Issuer to the corrected Terms and Conditions.
7. Should any provision of these Terms and Conditions be or become void in whole or in part, the other provisions shall remain in force. The void provision shall be replaced by a valid provision that reflects the economic intent of the void provision as closely as possible in legal terms. In those cases, however, the Issuer may also take the steps described in paragraphs 2 - 5 above.
8. Place of performance is Frankfurt am Main.
9. Place of jurisdiction for all disputes and other proceedings in connection with the Notes for merchants, entities of public law, special funds under public law and entities without a place of general jurisdiction in the Federal Republic of Germany is Frankfurt am Main. In such a case, the place of jurisdiction in Frankfurt am Main shall be an exclusive place of jurisdiction.
10. The English version of these Terms and Conditions shall be binding. Any translation is for convenience only.

SECTION D – RISKS

The purchase of Notes is associated with certain risks. The Issuer expressly points out that the description of the risks associated with an investment in the Notes describes only the major risks which were known to the Issuer at the date of the Base Prospectus.

Element	Description of Element	Disclosure requirement
D.2	Key risks specific to the issuer	The Notes entail an issuer risk, also referred to as debtor risk or credit risk for prospective investors. An issuer risk is the risk that Commerzbank becomes temporarily or permanently unable to meet its obligations to pay interest and/or the redemption amount or any other payments to be made under the Notes.

Furthermore, Commerzbank is subject to various risks within its business activities. Such risks comprise in particular the following types of risks:

Global Financial Market Crisis and Sovereign Debt Crisis

The global financial crisis and sovereign debt crisis, particularly in the eurozone, have had a significant material adverse effect on the Group's net assets, financial position and results of operations. There can be no assurance that the Group will not suffer further material adverse effects in the future, particularly in the event of a renewed escalation of the crisis. Any further escalation of the crisis within the European Monetary Union may have material adverse effects on the Group, which, under certain circumstances, may even threaten the Group's existence. The Group holds substantial volumes of sovereign debt. Impairments and revaluations of such sovereign debt to lower fair values have had material adverse effects on the Group's net assets, financial position and results of operations in the past, and may have further adverse effects in the future.

Macroeconomic Environment

The macroeconomic environment prevailing over the past few years continues to negatively affect the Group's results, and the Group's heavy dependence on the economic environment, particularly in Germany, may result in further substantial negative effects in the event of a possible renewed economic downturn.

Counterparty Default Risk

The Group is exposed to default risk (credit risk), including in respect of large individual commitments, large loans and commitments, concentrated in individual sectors, referred to as "cluster" risk, as well as loans to debtors that may be particularly affected by the sovereign debt crisis. The run-down of the ship finance portfolio and the Commercial Real Estate finance portfolio is exposed to considerable risks in view of the current difficult market environment and the volatility of ship prices and real estate prices and the default risk (credit risk) affected thereby, as well as the risk of substantial changes in the value of ships held as collateral directly owned, directly owned real estate and private and commercial real estate held as collateral. The Group has a substantial number of non-performing loans in its portfolio and these defaults may not be sufficiently covered by collateral or by write-downs and provisions previously taken.

Market Price Risks

The Group is exposed to market price risks in the valuation of equities and investment fund units as well as in the form of interest rate risks, credit spread risks, currency risks, volatility and correlation risks, commodity price risks.

Strategic Risks

There is a risk that the Group may not be able to implement its strategic agenda or may be able to do so only in part or at higher costs than planned, and that the implementation of planned measures may not lead to the achievement of the strategic objectives sought to be obtained.

Risks from the Competitive Environment

The markets in which the Group is active, particularly the German market (and, in particular, the private and corporate customer business and investment banking activities) and the Polish market, are characterized by intense competition on price and on transaction terms, which results in considerable pressure on margins.

Liquidity Risks

The Group is dependent on the regular supply of liquidity and a market-wide or company-specific liquidity shortage can have material adverse effects on the Group's net assets, financial position and results of operations. Currently, the liquidity supply of banks and other players in the financial markets is strongly dependent on expansive measures of the central banks.

Operational Risks

The Group is exposed to a large number of operational risks including the risk that employees will enter into excessive risks on behalf of the Group or violate compliance-relevant regulations in connection with the conduct of business activities and thereby cause considerable losses to appear suddenly, which may also lead indirectly to an increase in regulatory capital requirements.

Risks from Equity Participations

COMMERZBANK is exposed to particular risks in respect of the value and management of equity investments in listed and unlisted companies. It is possible that the goodwill reported in the Group's consolidated financial statements will have to be fully or partly written down as a result of impairment tests.

Risks from Bank-Specific Regulation

Ever stricter regulatory capital and liquidity standards and procedural and reporting requirements may call into question the business model of a number of the Group's activities, adversely affect the Group's competitive position, or make the raising of additional equity capital necessary. Other regulatory reforms proposed in the wake of the financial crisis, for example, requirements such as the bank levy, a possible financial transaction tax, the separation of proprietary trading from the deposit-taking business, or stricter disclosure and organizational obligations may materially influence the Group's business model and competitive environment.

Legal Risks

Legal disputes may arise in connection with COMMERZBANK's business activities, the outcomes of which are uncertain and which entail risks for the Group. For example, claims for damages on the grounds of flawed investment advice have led to substantial liabilities for the Group and may also lead to further substantial liabilities for the Group in the future. Payments and restoration of value claims have been asserted against COMMERZBANK and its subsidiaries, in some cases also in court, in connection with profit participation certificates and trust preferred securities they have issued. The outcome of such proceedings may have material adverse effects on the Group that go beyond the claims asserted in each case. Regulatory, supervisory and judicial proceedings may have a material adverse effect on the Group. D.6 Key information on the key risks that are specific to the securities

No secondary market immediately prior to final maturity

The market maker and/or the exchange will cease trading in the Notes shortly before their scheduled Maturity Date. However, between the last trading day and the relevant valuation date, the price of the Underlying(s) and/or the exchange rate, both of which may be relevant for the Notes may still change and any kind of threshold or price, as the case may be, which may be relevant for the payments under the Notes could be reached, exceeded or breached in another way for the first time. This may be to the investor's disadvantage.

No collateralization

The Notes constitute unconditional obligations of the Issuer. They are neither secured by the Deposit Protection Fund of the Association of German Banks (*Einlagensicherungsfonds des Bundesverbandes deutscher Banken e.V.*) nor by the German Deposit Guarantee and Investor Compensation Act (*Einlagensicherungs- und Anlegerentschädigungsgesetz*). This means that the investor bears the risk that the Issuer cannot or only partially fulfil the attainments due under the Notes. Under these circumstances, a total loss of the investor's capital might be possible.

This means that the investor bears the risk that the Issuer's financial situation may deteriorate - and that the Issuer may be subjected to reorganisation proceedings (*Reorganisationsverfahren*) or a transfer order (*Übertragungsanordnung*) under German bank restructuring law or that insolvency proceedings might be instituted with regard to its assets - and therefore attainments due under the Notes cannot or only partially be done. Under these circumstances, a total loss of the investor's investment might be possible.

The proposed financial transactions tax (FTT)

The European Commission has proposed a common financial transactions tax (FTT) to be implemented in Belgium, Germany, Estonia, Greece, Spain, France, Italy, Austria, Portugal, Slovenia and Slovakia. The proposed financial transactions tax could apply to certain dealings in the Notes (including secondary market transactions) in certain circumstances. However, the financial transactions tax is still subject to negotiation between the participating EU Member States. Additional EU Member States may

decide to participate. Furthermore, it is currently uncertain when the financial transactions tax will be enacted and when the tax will enter into force with regard to dealings with the Notes.

Risks in connection with the EU framework for the recovery and resolution of credit institutions and investment firms, with the EU Regulation establishing a Single Resolution Mechanism, and with the proposal for a new EU regulation on the mandatory separation of certain banking activities

The EU framework for the recovery and resolution of credit institutions and investment firms (the so-called Bank Recovery and Resolution Directive ("**BRRD**")) that will have to be applied by Member States from 1 January 2015, except for the general bail-in tool which is to be applied from 1 January 2016, provides *inter alia* for potential loss participation of creditors of failing credit institutions through a bail-in which gives the competent resolution authority the power to write down certain claims of unsecured creditors of a failing institution and to convert certain unsecured debt claims (including senior securities) to equity (the "**general bail-in tool**"), which equity could also be subject to any future application of the general bail-in tool.

Any such write-down (or conversion into equity) would not result in an early redemption. Consequently, any amounts so written down would be irrevocably lost and the holders of such instruments would cease to have any claims thereunder, regardless whether or not the bank's financial position is restored. The exercise of any power under the BRRD or any suggestion of such exercise could, therefore, materially adversely affect the rights of Securityholders, the price or value of their investment in any Securities and/or the ability of the Issuer and/or the Guarantor to satisfy its obligations under any Securities and/or the guarantee.

Further, the EU Regulation establishing a Single Resolution Mechanism ("**SRM Regulation**") contains provisions relating to resolution planning, early intervention, resolution actions and resolution instruments that should become applicable as of 1 January 2016. A centralised decision-making will be built around a Single Resolution Board. This framework should be able to ensure that, instead of national resolution authorities, there will be a single authority – i.e. the Board – which will take all relevant decisions for banks being part of the Banking Union.

On 29 January 2014, the European Commission adopted a proposal for a new mandatory separation of certain banking activities that is in many respects stricter than the requirements under the German bank separation law (sections 3(2)-(4), 25f, 64s of the German Banking Act (*Kreditwesengesetz* – KWG). European banks that exceed the following thresholds for three consecutive years: a) total assets are equal or exceed €30 billion; b) total trading assets and liabilities are equal or exceed €70 billion or 10% of their total assets, will be automatically banned from engaging in proprietary trading defined narrowly as activities with no hedging purposes or no connection with customer needs. In addition, such banks will be prohibited also from investing in or holding shares in hedge funds, or entities that engage in proprietary trading or sponsor hedge funds. Other trading and investment banking activities - including market-making, lending to venture capital and private equity funds, investment and sponsorship of complex securitisation, sales and trading of derivatives – are not subject to the ban, however they might be subject to separation. The proprietary trading ban would apply as of 1 January 2017 and the effective separation of other

trading activities would apply as of 1 July 2018. Should a mandatory separation be imposed, additional costs are not ruled out, in terms of higher funding costs, additional capital requirements and operational costs due to the separation, lack of diversification benefits.

U.S. Foreign Account Tax Compliance Act Withholding

The Issuer may be required to withhold tax at a rate of 30% on all, or a portion of, payments made after 31 December 2016 in respect of (i) securities issued or materially modified after the date that is six months after the date on which the final regulations applicable to "foreign passthru payments" are filed in the Federal Register or (ii) securities treated as equity for U.S. federal tax purposes, whenever issued, pursuant to the foreign account tax compliance act provisions of the U.S. Hiring Incentives to Restore Employment Act of 2010.

Impact of a downgrading of the credit rating

The value of the Notes could be affected by the ratings given to the Issuer by rating agencies. Any downgrading of the Issuer's rating by even one of these rating agencies could result in a reduction in the value of the Notes.

Termination, early redemption and adjustment rights

The Issuer shall be entitled to perform adjustments with regard to the Terms and Conditions or to terminate and redeem the Notes prematurely if certain conditions are met. This may have a negative effect on the value of the Notes as well as the Termination Amount. If the Notes are terminated, the amount payable to the holders of the Notes in the event of the termination of the Notes may be lower than the amount the holders of the Notes would have received without such termination.

Market disruption event

The Issuer is entitled to determine market disruption events that might result in a postponement of a calculation and/or of any attainments under the Notes and that might affect the value of the Notes. In addition, in certain cases stipulated, the Issuer may estimate certain prices that are relevant with regard to attainments or the reaching of barriers. These estimates may deviate from their actual value.

Substitution of the Issuer

If the conditions set out in the Terms and Conditions are met, the Issuer is entitled at any time, without the consent of the holders of the Notes, to appoint another company as the new Issuer with regard to all obligations arising out of or in connection with the Notes in its place. In that case, the holder of the Notes will generally also assume the insolvency risk with regard to the new Issuer.

Risk factors relating to the Underlying

The Notes depend on the value of the Underlying and the risk associated with this Underlying. The value of the Underlying depends upon a number of factors that may be interconnected. These may include economic, financial and political events beyond the Issuer's control. The past performance of an Underlying should not be regarded as an indicator of its future performance during the term of the Notes.

Risk relating to an early redemption

Under certain circumstances as set forth in the relevant Final Terms, the Notes may be redeemed early if certain conditions are met, which may adversely affect the economics of the Notes for the investor.

Risk at maturity:

The redemption of the Notes on the Maturity Date depends on the performance of the Underlying or Underlyings, as the case may be. If the Notes have an FX exposure, the Redemption Amount of the Notes and any additional amount payable under the Notes may not only depend on the performance of the Underlying or Underlyings, as the case may be, but also on the development of the Conversion Rate.

If the Basket Performance is equal to or less than 1 (one), the Redemption Amount will be the Denomination multiplied by the Return Factor. If the Return Factor is 0 (zero) there will be no Redemption Amount payable at all. **In such case, the investor will lose the total amount of the invested capital (including transaction costs).**

Risks if the investor intends to sell or must sell the Notes during their term:*Market value risk:*

The achievable sale price prior to the Maturity Date could be significantly lower than the purchase price paid by the investor.

The market value of the Notes mainly depends on the performance of the Underlying(s). In particular, the following factors may have an adverse effect on the market price of the Notes:

- Changes in the expected intensity of the fluctuation of the Underlying(s) (volatility)
- Remaining term of the Notes
- Interest rate development
- Adverse changes of the currency exchange rates
- Development of the dividends of the shares comprising the Index/Indices

Each of these factors could have an effect on its own or reinforce or cancel each other.

Trading risk:

The Issuer is neither obliged to provide purchase and sale prices for the Notes on a continuous basis on (i) the exchanges on which the Notes may be listed or (ii) an over the counter (OTC) basis nor to buy back any Notes. Even if the Issuer generally provides purchase and sale prices, in the event of extraordinary market conditions or technical troubles, the sale or purchase of the Notes could be temporarily limited or impossible.

SECTION E – OFFER

Element	Description of Element	Disclosure requirement
E.2b	Reason for the offer and use of proceeds when different from making profit and/or hedging certain risks	- not applicable - Profit motivation
E.3	Description of the terms and conditions of the offer	Commerzbank offers during the subscription period from 25 May 2015 until 26 June 2015 SEK 100,000,000 Notes at an initial offer price of 110% per Note (including a distribution fee of up to 1% p.a.). The Issuer is entitled to (i) close the subscription period prematurely, (ii) extend the subscription period or (iii) cancel the offer. After expiry of the subscription period, the Notes continue to be offered by the Issuer. The offer price will be determined continuously.
E.4	Any interest that is material to the issue/offer including conflicting interests	The following conflicts of interest can arise in connection with the exercise of rights and/or obligations of the Issuer in accordance with the Terms and Conditions of the Notes (e.g. in connection with the determination or adaptation of parameters of the terms and conditions), which affect the amounts payable: <ul style="list-style-type: none"> - execution of transactions in the Underlying(s) - issuance of additional derivative instruments with regard to the Underlying(s) - business relationship with the Issuer of the Underlying(s) - possession of material (including non-public) information about the Underlying(s) - acting as Market Maker
E.7	Estimated expenses charged to the investor by the issuer or the offeror	- not applicable - The investor can usually purchase the Notes at a fixed issue price. This fixed issue price contains all cost of the Issuer relating to the issuance and the sales of the Notes (e.g. cost of distribution, structuring and hedging as well as the profit margin of Commerzbank).

Avsnitt D – Risker

Köpet av Värdepapperen är förenat med vissa risker. Emittenten framhäver särskilt att beskrivningen av riskerna förenade med en investering i Värdepapperen endast beskriver de väsentliga risker som var kända för Emittenten per dagen för Grundprospektet.

Punkt	Beskrivning av Punkt	Upplysningskrav
D.2	Huvudsakliga risker specifika för Emittenten	Obligationerna medför en emittentrisk, även kallad gäldenärsrisk eller kreditrisk, för presumtiva investerare. En emittentrisk är risken för att Commerzbank tillfälligt eller permanent blir oförmöget att fullgöra sina skyldigheter att betala ränta och/eller inlösenbeloppet eller någon annan betalning som skall göras enligt Obligationerna.

Dessutom är Commerzbank utsatt för olika risker i samband med sin affärsverksamhet. Sådana risker omfattar i synnerhet följande typer av risker:

Globala finansmarknadskriser och statskuldkriser

Den globala finansmarknadskrisen och statskuldkrisen, i synnerhet i euroområdet, har haft en betydande väsentligt negativ effekt på Koncernens nettotillgångar, finansiella ställning och rörelseresultat. Det kan inte garanteras att Koncernen inte kommer att drabbas av ytterligare väsentligt negativa effekter i framtiden, i synnerhet om krisen åter skulle förvärras. Skulle krisen inom Europeiska monetära unionen eskalera ytterligare skulle det kunna innebära väsentligt negativa effekter för Koncernen, vilket, under vissa omständigheter även skulle kunna hota Koncernens existens. Koncernen innehar en betydande volym statspapper. Nedskrivningar och omvärderingar av sådana statspapper till ett lägre verkligt värde har tidigare haft väsentligt negativa effekter på Koncernens nettotillgångar, finansiella ställning och rörelseresultat, och kan få ytterligare negativa effekter i framtiden.

Makroekonomisk miljö

Den makroekonomiska miljö som rått under de senaste åren fortsätter att påverka Koncernens resultat negativt och Koncernens kraftiga beroende av det ekonomiska klimatet, i synnerhet i Tyskland, skulle kunna resultera i ytterligare avsevärt negativa effekter i det fall den ekonomiska konjunkturen skulle vända ned igen.

Motpartsrisk

Koncernen är exponerad för motpartsrisk (kreditrisk), bland annat beträffande stora enskilda lån och åtaganden koncentrerade till enskilda sektorer – så kallad klusterrisk – samt beträffande lån till gäldenärer som kan påverkas särskilt av statskuldkrisen. Stängningen av fartygfinansieringsportföljen och portföljen för finansiering av kommersiella fastigheter är exponerad mot avsevärda risker i ljuset av den rådande svåra marknadsmiljön och volatiliteten i skepps- och fastighetspriser samt motpartsrisken (kreditrisken) som påverkas därav, liksom risken av betydande förändringar i värdet på fartyg som utgör säkerhet samt direkt ägda fastigheter och privata och kommersiella fastigheter som utgör säkerhet. Koncernen har i sin portfölj ett stort antal nödlidande lån, och det kan hända att utebliven betalning på dessa lån inte är fullt täckt av säkerheter eller av tidigare gjorda nedskrivningar och avsättningar.

Marknadsprisrisker

Koncernen är utsatt för marknadsprisrisker i värderingen av aktier och andelar i placeringsfonder, samt för ränterisker, kreditspridningsrisker, valutarisker, volatilitets- och korrelationsrisker samt råvaruprisrisker.

Strategiska risker

Det finns en risk för att Koncernen inte kommer att kunna genomföra sina strategiska planer eller endast kommer kunna göra det till viss del eller till högre kostnader än planerat, och att genomförandet av de planerade åtgärderna kanske inte kommer att leda till att de eftersträvade strategiska målen uppnås.

Risker från konkurrensmiljön

De marknader inom vilka Koncernen är aktiv, särskilt den tyska marknaden (och i synnerhet verksamheten riktad mot privat- och företagskunder samt *investment banking*-verksamheten) och den polska marknaden, är karaktäriserade av intensiv konkurrens vad gäller pris och transaktionsvillkor vilket resulterar i avsevärd marginalpress.

Likviditetsrisker

Koncernen är beroende av regelbunden tillförsel av likviditet och en marknadsomfattande eller företagsspecifik likviditetsbrist kan få väsentliga negativa effekter på Koncernens nettotillgångar, finansiella ställning och rörelseresultat. För närvarande är den likviditet som banker och andra finansmarknadsaktörer tillhandahåller beroende av centralbankernas expansiva åtgärder.

Operationella risker

Koncernen är utsatt för ett stort antal operationella risker, däribland risken för att medarbetarna utsätter Koncernen för omfattande risker på Koncernens bekostnad eller bryter mot lagstiftning relevant för regelefterlevnad under sina affärsaktiviteter och därigenom orsakar en plötslig uppkomst av avsevärda förluster vilka också indirekt skulle kunna leda till en ökning av kapitalkrav genom statlig reglering.

Risker från aktiepositioner

COMMZERBANK är exponerad mot särskilda risker när det gäller värdet och förvaltningen av investeringar i noterade och icke-noterade företag. Det är möjligt att den goodwill som redovisas i Koncernens balansräkning helt eller delvis måste skrivas ned som ett resultat av nedskrivningstester.

Risker från bankspecifik lagstiftning

Allt strängare krav avseende kapital och likviditet samt processuella krav och rapporteringskrav kan leda till att affärsmodellen i ett antal av Koncernens verksamheter ifrågasätts och kan få en negativ effekt för Koncernens konkurrenskraft eller göra det nödvändigt att anskaffa ytterligare aktiekapital. Andra lagreformer som föreslås i kölvattnet efter finanskrisen, till exempel bankskatt eller en möjlig skatt på finansiella transaktioner, separationen av egenhandel (*proprietary trading*) från placeringsverksamheten eller strängare upplysnings- eller organisationskrav, skulle väsentligen kunna påverka koncernens affärsmodell och konkurrensmiljö.

Juridiska risker

Tvister kan uppkomma med anknytning till COMMERZBANKs affärsverksamhet. Sådana tvisters utfall går inte att förutspå vilket medför risk för Koncernen. Exempelvis har skadeståndsanspråk på grund av bristfälliga investeringsråd lett till betydande ansvar för Koncernen och kan komma att leda till ytterligare betydande ansvar för Koncernen i framtiden. Betalnings- och ersättningsanspråk har riktats mot COMMERZBANK och dess dotterbolag, i vissa fall i domstol, i samband med vinstutdelningscertifikat och så kallade *trust preferred securities* som emitterats av Koncernen. Resultaten av rättsprocesserna kan få väsentligt negativa effekter på Koncernen som går utöver de anspråk som framställts i respektive fall. Regulatoriska processer, tillsynsprocesser och rättsliga förfaranden kan få en väsentlig negativ effekt på Koncernen. Rättsprocesser som inleds av lagstiftare, tillsynsmyndigheter och åklagare kan få en väsentlig negativ effekt på Koncernen.

D.6 Huvudsakliga risker specifika för värdepapperen

Ingen sekundärmarknad omedelbart före slutligt förfall

Marknadsgarantens och/eller börsens handel med Obligationerna kommer att upphöra strax före Obligationernas Förfalldag. Dock kan, mellan den sista handelsdagen och den relevanta värderingsdagen, priset på den Underliggande Tillgången och/eller gällande växelkurs, som båda kan vara relevanta för Obligationerna, fortfarande ändras, och alla typer av trösklar eller kurser, i förekommande fall, som kan vara relevanta för betalningar enligt Obligationerna, kan komma att nås, överskridas eller på annat sätt brytas för första gången. Detta kan vara till investerarens nackdel.

Ingen säkerhet

Obligationerna utgör ovillkorade förpliktelser för Emittenten. De garanteras varken av den Tyska Bankföreningens Insättningsgarantinämnd (*Einlagensicherungsfonds des Bundesverbandes deutscher Banken e.V.*) eller av den tyska lagen om insättningsgaranti och investerarskydd (*Einlagensicherungs- und Anlegerentschädigungsgesetz*). Det betyder att investerarna bär risken för att Emittenten inte kan fullgöra sina skyldigheter enligt Obligationerna, eller endast kan fullgöra dem delvis. Under dessa omständigheter är det möjligt att investeraren förlorar hela sitt kapital.

Det betyder att investeraren bär risken för att Emittentens finansiella situation kan komma att försämrats och att Emittenten därför blir föremål för omstruktureringsförfaranden (*Reorganisationsverfahren*) eller ett överlåtelseförfarande (*Übertragungsanordnung*) enligt den tyska omstruktureringslagen eller att insolvensförfaranden kan komma att inledas avseende Emittentens tillgångar – och leda till att Emittenten inte kan göra några utbetalningar enligt Obligationerna, eller endast göra vissa utbetalningar. Under dessa omständigheter är det möjligt att investeraren förlorar hela sin investering.

Den föreslagna skatten på finansiella transaktioner (FTT)

Den Europeiska Kommissionen har föreslagit en gemensam skatt på finansiella transaktioner (FTT) att implementeras i Belgien, Tyskland, Estland, Grekland, Spanien, Frankrike, Italien, Österrike, Portugal, Slovenien och Slovakien. Den föreslagna skatten på finansiella transaktioner kan under vissa omständigheter, komma att omfatta viss handel i Obligationerna (inklusive handel på sekundärmarknaden). Skatten på finansiella transaktioner är emellertid fortfarande föremål för förhandling mellan de deltagande

Medlemsstaterna. Ytterligare Medlemsstater kan välja att delta. Dessutom är det för närvarande osäkert när skatten på finansiella transaktioner kommer att införas och när skatten kommer att börja äga tillämpning vad avser handel med Obligationerna.

Risker i samband med införande av en regim för återhämtning, rekonstruktion och avveckling för kreditinstitut

EU:s ramverk för återhämtning, rekonstruktion och avveckling för kreditinstitut och värdepappersföretag, det så kallade *Bank recovery and resolution directive* eller BRRD ("**Krishanteringsdirektivet**"), ska tillämpas av EU:s medlemsstater från och med den 1 januari 2015, med undantag för bestämmelserna om nedskrivning och/eller konvertering av skuldinstrument (*bail-in*) som skall tillämpas av medlemsstaterna från och med den 1 januari 2016. Krishanteringsdirektivet innefattar bland annat att ett kreditinstituts borgenärer potentiellt får delta i att bära uppkomna förluster genom ett förfarande där den relevanta myndigheten ges befogenhet att skriva ned vissa icke säkerställda fordringar från borgenärer till ett kreditinstitut på obestånd samt att konvertera vissa icke säkerställda skuldanspråk (inklusive seniora värdepapper) till aktier ("**Bail in-verktyget**"), som i sin tur kan bli föremål för framtida tillämpning av Bail in-verktyget.

Nedskrivning (eller konvertering till aktier) genom användande av Bail in-verktyget kommer inte att medföra förtida inlösen. Följaktligen kommer alla summor som skrivs ned att oåterkalleligen förloras, och innehavarna av sådana instrument skulle förlora sina anspråk enligt instrumenten oberoende av huruvida bankens finansiella ställning återställs. Användning av Krishanteringsdirektivet eller förslag om sådan användning kan därför ha en väsentlig negativ inverkan på Värdepappersinnehavarna rättigheter, kursen eller värdet på deras investering i något Värdepapper och/eller möjligheten för Emittenten eller Garanten att uppfylla sina förpliktelser under något Värdepapper eller garantin.

EU-förordningen genom vilken den gemensamma rekonstruktionsmekanismen ("**SRM-förordningen**") inrättats innehåller bestämmelser hänförliga till resolutionsplanering, tidiga ingripanden, resolutionsåtgärder och resolutionsverktyg som skall tillämpas från och med den 1 januari 2016. Ett centraliserat beslutsfattande kommer att byggas kring en gemensam resolutionsnämnd. Detta ramverk avser att säkerställa att det istället för nationella resolutionsmyndigheter inrättas en enda myndighet, nämnden, som kommer att fatta alla relevanta beslut för banker som utgör del av Bankunionen.

Den 29 januari 2014 antog den Europeiska Kommissionen ett förslag för en ny obligatorisk separation av vissa bankverksamheter från varandra. Förslaget är i många avseenden mer strikt än de krav som uppställs av den tyska banksepareringslagen (paragrafer 3(2)-(4), 25f samt 64s i den tyska banklagen *Kreditwesengesetz*, KWG). Förslaget innebär att europeiska banker som överskrider vissa tröskelvärden under tre år i följd automatiskt kommer att förbjudas från att bedriva egenhandel (*proprietary trading*), snävt definierat som aktiviteter utan säkringssyfte eller koppling till kunders behov. Dessa tröskelvärden är antingen (i) att totala tillgångar lika med eller överstigande 30 miljarder euro eller (ii) att totala tradingtillgångar och skulder är lika med eller överstiger 70 miljarder euro eller tio procent av de totala tillgångarna. Sådana banker kommer heller inte att tillåtas att köpa eller behålla andelar i hedgefonder eller bolag som bedriver egenhandel eller sponsrar hedgefonder. Andra trading- och investment banking-verksamheter – inklusive market making,

utlåning till venture capital- och private equity-fonder, investering i och sponsring av komplex värdepapperisering, försäljning av och handel med derivat – är inte föremål för förbud men kan bli föremål för separation. Egenhandelsförbudet skulle äga tillämpning från och med den 1 januari 2017 och den effektiva separationen av andra tradingverksamheter skulle tillämpas från och med den 1 juli 2018. Skulle en obligatorisk separation införas kan ytterligare kostnader inte uteslutas, exempelvis högre finansieringskostnader, ökade kapitalkrav och kostnader förknippade med verksamheten på grund av separationen eller förlust av diversifieringsfördelar.

Krav på innehållande av källskatt enligt FATCA

Emittenten kan tvingas innehålla källskatt på 30 procent på vissa eller samtliga betalningar gjorda efter den 31 december 2016 avseende (i) värdepapper som emitteras eller ändras väsentligt efter den dag som infaller sex månader efter den dag då de slutliga bestämmelserna tillämpliga på så kallade *foreign passthru payments* ges in till US Federal Register, eller (ii) värdepapper som betraktas som aktier i amerikanskt skatterättsligt hänseende, närhelst de utfärdats, enligt bestämmelserna om utländska konton i US Hiring Incentives to Restore Employment Act of 2010.

Effekter av en nedgradering av kreditvärdigheten

Värdet på Obligationerna kan påverkas av det kreditbetyg som kreditvärderingsföretag ger Emittenten. En eventuell nedgradering av Emittentens kreditvärdighet av endast ett av dessa kreditvärderingsföretag skulle kunna resultera i att Obligationerna minskar i värde.

Uppsägning, förtida inlösen och justeringsrättigheter

Emittenten har rätt att utföra justeringar i Villkoren eller säga upp och lösa in Obligationerna i förtid om vissa villkor är uppfyllda. Detta kan få negativa effekter på Obligationernas värde samt Uppsägningsbeloppet. Om Obligationerna sägs upp kan det belopp som ska utbetalas till Obligationsinnehavarna i händelse av en uppsägning av Obligationerna bli lägre än det belopp som Obligationsinnehavarna skulle ha erhållit utan uppsägningen

Marknadsstörande händelse

Emittenten har rätt att fastställa marknadsstörande eller andra händelser som kan leda till att både beräkningar och/eller betalningar enligt Obligationerna skjuts upp, vilket kan påverka Obligationernas värde. Dessutom kan Emittenten, i vissa fall, uppskatta vissa relevanta priser när det gäller att nå eller passera gränser. Dessa uppskattningar kan avvika från det verkliga värdet.

Byte av Emittent

Om de gällande Villkoren är uppfyllda har Emittenten rätt att när som helst och utan medgivande från innehavarna av Obligationerna i sitt ställe utse ett annat företag som ny Emittent, och överlåta alla förpliktelser med anknytning till Obligationerna. I så fall får innehavaren av Obligationerna i allmänhet också ta den insolvensrisk som förknippas med den nya Emittenten.

Risikfaktorer som förknippas med de Underliggande Tillgångarna

Obligationerna är beroende av värdet på den Underliggande Tillgången och den risk som förknippas med den Underliggande

Tillgången. Värdet av den Underliggande Tillgången beror på många faktorer som kan höra ihop. Det kan röra sig om ekonomiska, finansiella och politiska händelser som ligger utanför Emittentens kontroll. Historisk avkastningen på en Underliggande Tillgång kan inte betraktas som en indikation på framtida avkastning under Obligationernas löptid.

Risk förknippad med förtida inlösen

Under vissa omständigheter som anges i de relevanta Slutliga Villkoren kan Obligationerna komma att lösas in i förtid om vissa villkor är uppfyllda, vilket kan få en negativ påverkan på Obligationernas ekonomi för investeraren.

Risk vid förfall

Inlösen av Obligationer på Förfalldagen beror på utvecklingen för den Underliggande Tillgången eller de Underliggande Tillgångarna. Om Obligationerna har en Valutaexponering, beror Obligationernas Inlösenbelopp och andra tillkommande belopp betalningsbara under Obligationerna inte bara på utvecklingen för den Underliggande Tillgången eller de Underliggande Tillgångarna, utan även på den relevanta Omräkningskursens Utveckling.

Om Korgens Utveckling är lika med eller mindre 1 (ett) blir Inlösenbeloppet Denomineringen multiplicerat med Avkastningsfaktorn. Om Avkastningsfaktorn är 0 (noll) utbetalas inget Inlösenbelopp överhuvudtaget. **I så fall förlorar investeraren hela det investerade kapitalet (inklusive transaktionskostnader).**

Risker om investeraren avser eller måste sälja Obligationerna under deras löptid:

Marknadsvärderisk:

Det försäljningspris som går att uppnå före Förfalldagen kan vara väsentligt lägre än det inköpspris som investeraren betalat.

Obligationernas marknadsvärde beror huvudsakligen på den Underliggande Tillgångens utveckling. I synnerhet kan följande faktorer ha en väsentlig inverkan på Obligationernas marknadsvärde:

- Förändringar i den förväntade intensiteten i fluktuationerna för den Underliggande Tillgången (volatilitet)
- Återstående löptid för Obligationerna
- Ränteutveckling
- Negativa förändringar i växelkurserna
- Utdelningsutvecklingen för de aktier som utgör Index

Var och en av dessa faktorer kan påverka i sig, eller förstärka eller motverka varandra.

Handelsrisk:

Emittenten är varken skyldig att fortlöpande tillhandahålla köp- och säljkurser för Obligationerna på (i) de börser där Obligationerna är noterade eller på (ii) OTC-basis (over the counter), eller att köpa tillbaka Obligationer. Även om Emittenten normalt tillhandahåller köp- och säljkurser kan köp och försäljning av Obligationerna, under extraordinära marknadsvillkor eller vid tekniska problem, tillfälligt

begränsas eller omöjliggöras.
